The group exhibition 'Papier.Salon III' shows a fine selection of works on paper by various artists. The medium of paper reveals a special fascination in that it often provides direct information about the artist's work and idea process. The selected works are not sketches or studies, but autonomous works within an artistic oeuvre.

'Papier.Salon III' is already the third edition of this group exhibition at Galerie Wentrup, which this time builds a bridge between the two locations Berlin and Hamburg.
